

Overview

The ImagePoint 4x4™ is a fanless Cellular Router Gateway and PC server all in one, made with lock down connectors and for high resistance to vibration. The system is ideal for Vehicle Video recording, Monitoring vehicle metrics with Alerts, and GPS tracking. The 4x4 is certified for use on the Verizon cellular network.

Features

Quad- core 1.2+Ghz CPU

Eden x4 CPU offers double the performance with lower power consumption.

Certified for the Cellular network

Unit has been ETL approved to be activated with cellular on the Verizon network.

Can be activated on AT&T

Integrated SIM Card Reader

Integrated in is a mini-PCIe slot, with a SIM card reader allowing users to enable LTE, GSM, EvDO, 1XrTT, The Unit is certified for use on the Verizon network.

I/O Interfaces

This product provides rich a I/O interface, includes two GbE LAN ports, 3 serial COM ports, 1 I/O port, two USB 2.0 locking ports and two 3.0 USB ports for communications.

Operating Temperature

This product is ruggedized to support vibration and a wide range of temperatures. Outfitted with industrial components this appliance can thrive in harsh conditions. -40c to 60c, operating temperature.

Display Ports

This platform comes with multiple video-out ports (VGA and HDMI)

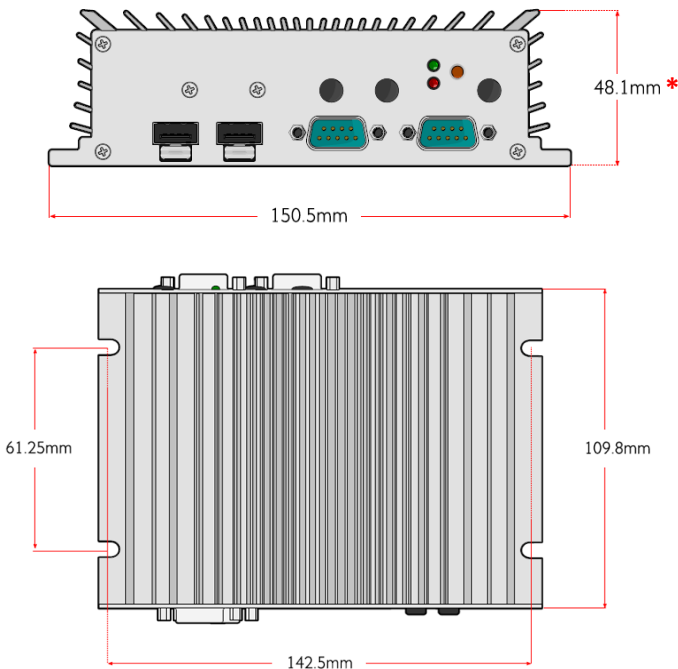

Dirt and Dust Proof Design

Solid chassis design with a fanless interior allows this product to be completely dustproof.

Mounting

This product provides flexible mounting possibilities for all Vehicles.
